

My water—My watershed

There are 100 spaces covering the picture of Earth.

Color 97 spaces blue.

Color 2 spaces black.

Color 1 space red.

The 100 spaces stand for all of the water on planet earth.

The blue spaces stand for the salt water that is found in oceans which is 97% of all the water on earth.

The black spaces stand for the water that is frozen in glaciers and ice caps which is 2% of all the water on earth.

The red space stands for the fresh water found on earth. Only 1% of earth's water is fresh and can be used by people, plants and animals to live.

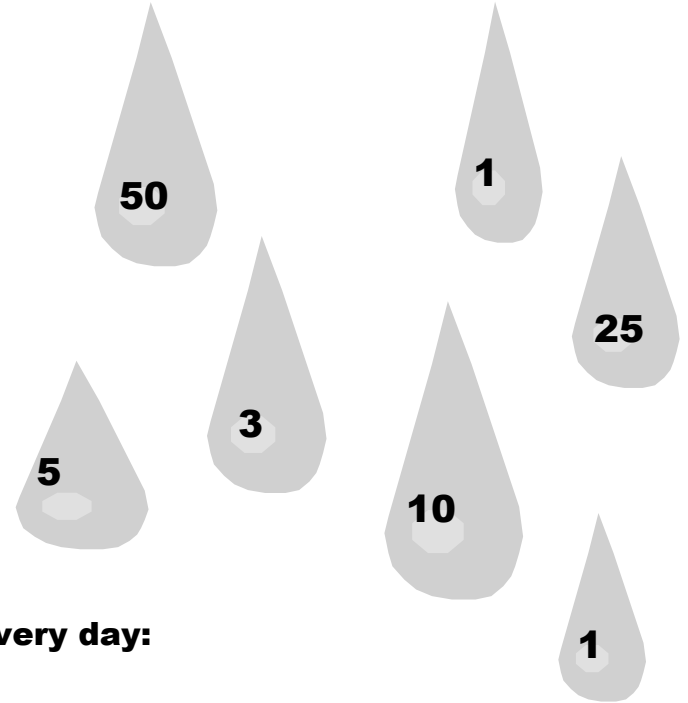

It is very important to take good care of the water in **YOUR watershed. We only have 1% of earth's fresh water to share!**

Using the Water in My Watershed

Draw a line to match the ways people use water to the water drop with the number of gallons of water used. for each activity.

- TAKING A BATH
- WASHING CLOTHES
- TAKING A 10 MINUTE SHOWER
- BRUSHING TEETH
- WASHING HANDS
- FLUSHING A TOILET
- WASHING DISHES

List some ways you use water every day:
